Gajendra Singh Verma

QA Professional - Automation & Manual

📄 Profile

As a highly skilled QA professional with over 11 years and 3 month of experience, I have a proven track record of delivering high-quality software products using manual and automation methods. I have experience in Automation testing using Robot Framework and Python with Selenium, Requests (API Testing) and other libraries. I am a Payments Domain Specialist and have worked on SEPA, SWIFT, ISO20022, Payments of UK and Scandinavia. My expertise includes designing and implementing test strategies, test plans, creation and execution of functional & non-functional test cases and ensuring the delivery of high-quality software products. I have worked in Agile/Scrum setting and have knowledge of DevOps and its components. With excellent communication skills, I am committed to ensuring the success of every project I work on.
